Other Generic		2.04	0.91	1.08	0.75	0.54	—	—	—	—

Notes: -- All percentages are rounded to the nearest hundredth and all unit prices are rounded to the nearest cent.

¹ The NDCs included in the market share calculations were selected based on similar product descriptions.

² AWP values are as of June 30th for each year.

³ Warrick 59930150006 and 59930150008 have data points for 2000-2004, while Warrick 59930151701 and 59930151702 have data points for 2003-2004.

⁴ Although sales appear in IMS for Dey Labs 49502069724, 49502069729, and 49502069761, the NDCs do not appear in either the RedBook or MediSpan until 2004.

⁵ Ivax 00172640544 and 00172640549 have been set at an AWP of \$0.41 for 2000-2004. However, Ivax 00172640544 is \$0.41 in 2000 and \$0.4116 in the four years thereafter, while Ivax 00172640549 is \$0.41167 in all five years.

⁶ Nephron 00487950103 and 00487950160 have data points for 2000-2004, while Nephron 00487950101 and 00487950125 have data points for 2002-2004. Nephron lowered its AWP's to \$0.26667 in 2002-2004.

⁷ RX Elite 66794000130 and 66794000160 have data points for 2002-2004, while RX Elite 66794000125 has data points for 2003-2004.

⁸ The unit AWP's for Schering 00085180601 and 00085020901 are not included in exhibit 8B and therefore are not included.

Notes:

- ¹ All percentages are rounded to the nearest hundredth and all unit AWP's are rounded to the nearest cent.
- ² The NDCs included in the market share calculations were selected based on similar product descriptions.
- ³ AWP values are as of June 30th for each year. However, Nephron's AWP for 00487990130 first appears in September 2001.
- ⁴ Warrick 59930151504 has data points for 2000-2004, while Warrick 59930164702 has data points for 2003-2004.
- ⁵ Schering 00085020802 has data points for 2000-2004, while Schering 00085133601 has a data point for 2004 only.
- ⁶ Although sales appear in IMS for Schering 00085133601, the NDCs do not appear in Medispan until 2004.
- ⁷ The unit AWP's for GlaxoSmithKline (Ventolin) 00173038558 are not included in exhibit 7B and therefore are not included.

Notes: * Values in this table are rounded to the nearest hundredth.

1 Unit AWP's are shown by drug product and NDC.

2 The NDC's used are all of the Schering-Plough NDC's assigned to the INJ.

3 The concentration is shown first by Drug Description and then by the NDC.

4 Several sources have the drug description for this NDC as 10MU/10MU.

5 Several sources have the drug description for this NDC as 10MU/10MU.

6 The concentration values used for these two Intron-A NDC's are 3 and 5, respectively, based on the strength of the drug at the time of the NDC's.

7 The Intron-A Product Information label explains that the first column of the drug at the time of the NDC's.

8 The Intron-A Product Information label explains that the first column of the drug at the time of the NDC's.

9 The Intron-A Product Information label explains that the first column of the drug at the time of the NDC's.

10 The Intron-A Product Information label explains that the first column of the drug at the time of the NDC's.

11 The Intron-A Product Information label explains that the first column of the drug at the time of the NDC's.

12 The Intron-A Product Information label explains that the first column of the drug at the time of the NDC's.

13 The Intron-A Product Information label explains that the first column of the drug at the time of the NDC's.

14 The Intron-A Product Information label explains that the first column of the drug at the time of the NDC's.

15 The Intron-A Product Information label explains that the first column of the drug at the time of the NDC's.

16 The Intron-A Product Information label explains that the first column of the drug at the time of the NDC's.

17 The Intron-A Product Information label explains that the first column of the drug at the time of the NDC's.

18 The Intron-A Product Information label explains that the first column of the drug at the time of the NDC's.

19 The Intron-A Product Information label explains that the first column of the drug at the time of the NDC's.

20 The Intron-A Product Information label explains that the first column of the drug at the time of the NDC's.

21 The Intron-A Product Information label explains that the first column of the drug at the time of the NDC's.

22 The Intron-A Product Information label explains that the first column of the drug at the time of the NDC's.

23 The Intron-A Product Information label explains that the first column of the drug at the time of the NDC's.

24 The Intron-A Product Information label explains that the first column of the drug at the time of the NDC's.

25 The Intron-A Product Information label explains that the first column of the drug at the time of the NDC's.

26 The Intron-A Product Information label explains that the first column of the drug at the time of the NDC's.

27 The Intron-A Product Information label explains that the first column of the drug at the time of the NDC's.

28 The Intron-A Product Information label explains that the first column of the drug at the time of the NDC's.

29 The Intron-A Product Information label explains that the first column of the drug at the time of the NDC's.

30 The Intron-A Product Information label explains that the first column of the drug at the time of the NDC's.

31 The Intron-A Product Information label explains that the first column of the drug at the time of the NDC's.

32 The Intron-A Product Information label explains that the first column of the drug at the time of the NDC's.

33 The Intron-A Product Information label explains that the first column of the drug at the time of the NDC's.

34 The Intron-A Product Information label explains that the first column of the drug at the time of the NDC's.

35 The Intron-A Product Information label explains that the first column of the drug at the time of the NDC's.

36 The Intron-A Product Information label explains that the first column of the drug at the time of the NDC's.

37 The Intron-A Product Information label explains that the first column of the drug at the time of the NDC's.

38 The Intron-A Product Information label explains that the first column of the drug at the time of the NDC's.

39 The Intron-A Product Information label explains that the first column of the drug at the time of the NDC's.

40 The Intron-A Product Information label explains that the first column of the drug at the time of the NDC's.
